DETAILED ACTION

1. Applicant's amendment filed 12/3/03 is acknowledged and has been entered.
2. Claims 46-48 on page 4 of the amendment filed 12/3/03 have been renumbered as claims 44-46 according to 37 CFR 1.126 because when claims are added, they must be numbered by the Applicant consecutively beginning with the number next following the highest numbered claim previously presented.
3. Applicant is required to (1) elect a single disclosed species of agonist peptide and composition thereof, agonist peptide-conjugate and kit comprising the said agonist peptide, to which claims would be restricted if no generic claim is finally held to be allowable and (2) to list all claims readable thereon including those subsequently added, i.e.,
 - a. a specific agonist peptide, for example, one of the single disclosed species recited in claim 5, and
 - b. a specific composition comprising the same specific agonist peptide of (a), a specific pharmaceutically acceptable carrier such as a liposome, a specific immunostimulatory molecule such as GM-CSF, a specific adjuvant such as Freund's adjuvant, a specific drug such as a chemotherapeutic drug, a specific HLA class I molecule or a cell expressing a specific HLA class I molecule, such as for example HLA-A2, and
 - c. a specific agonist-peptide conjugate such as one comprising the same specific agonist peptide of (a) conjugated to a carrier molecule such as tetanus toxoid-CD4 epitope, and
 - d. a specific kit comprising the same specific agonist peptide of (a), the same specific immunostimulatory molecule of (b) such as GM-CSF, and a specific epitope that the encoded CEA comprises, a specific SEQ ID NO).

These species are distinct because their structures are different.

4. Applicant is required under 35 U.S.C. § 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable.
5. Applicant is advised that a response to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Art Unit: 1644

6. Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 C.F.R. § 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. M.P.E.P. § 809.02(a).

7. Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. § 103 of the other invention.

8. Applicant is advised that the response to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed.

9. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 C.F.R. § 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a diligently-filed petition under 37 C.F.R. § 1.48(b) and by the fee required under 37 C.F.R. § 1.17(h).
